2022 COMMUNITY REPORT

GCGV Continues Good Neighbor Commitment Throughout First Year of Operations

ExxonMobil
Named ACC
Responsible Care®
Company of the Year

 **GULF COAST
GROWTH VENTURES**
An ExxonMobil and SABIC joint venture

How do we define success?

This question has made its rounds through Gulf Coast Growth Ventures often during our first year of operations. GCGV defines success through our values. **We strive to be the safest plant in the world, the best neighbor in our community, the most competitive plant in the region and a great place to work.**

Paul Fritsch
President/Site Mgr.

To start, to date we have reached **over 3.5 million safe work hours in 2022 and achieved an injury free first year of operations** with no process safety incidents. This is a testament to the hard work and commitment of everyone on site.

Our people shape our success. We have worked to develop a culture of safety and hard work, as well as transparency, service and support. GCGV employees embody this culture day in and day out, both at work and in the community. That's what makes this a great place to work.

Our facility is integrated into this community, and we work together to make it thrive. We work and live here, and have a high interest in protecting our environment and community. Through our partnerships and investments with the United Way, G-PISD, Coastal Bend Bays and Estuaries Program, and many others, we have proven our commitment to making positive and meaningful impacts in the region and being the best neighbor.

On behalf of all of those at Gulf Coast Growth Ventures, I want to extend a heartfelt thank you to our staff, partners, and the community at large. **We look forward to continuing our efforts in the many years to come.**

Paul Fritsch

GCGV Celebrated a Successful Startup

The facility started operations in late 2021 and that included a well-deserved thank you to vendors, contractors and employees who completed construction and commissioning during one of the most trying periods in history. Despite the pressures of the global pandemic, our contractors and employees completed construction early and under budget.

Several celebratory events were held to show our appreciation to the community and our many partners. We held a Startup Celebration in March, an employee celebration in May and a family day for our employees to show off the new facility.

GCGV: A Community Partner You Can Count on

The four pillars of our **Good Neighbor Program** are **quality of life, health and safety, education and workforce development, and environmental stewardship**. Together, we work with our community to make investments based on local needs.

GCGV contributed over \$10 million to the Coastal Bend region in community enrichment projects throughout project development and construction.

Through joint efforts, Chiyoda Kiewit Joint Venture, GCGV's largest contractor, **donated \$5 million to help fund a new City of Gregory Municipal Complex** that houses administrative offices and the fire station.

To support local environmental preservation, conservation and rehabilitation programs, ExxonMobil, GCGV's partner and operator, **made a \$2 million investment in the Texas State Aquarium's Wildlife Rescue Center.**

In collaboration with the community, GCGV has invested over \$2 million since 2020 in two air monitoring stations in Portland. Review of the data generated from continuous air sampling shows **no change in air quality since startup of the air monitors in 2019.**

GCGV's partnership with Gregory-Portland ISD continues to be a priority. GCGV supports school events, clubs, activities and student learning opportunities through donations and volunteerism.

GCGV **contributed \$81,000 in 2022 to environmental organizations** to enhance science education and research throughout the area, including significant donations to University of Texas Marine Science Institute and Harte Research Institute for Gulf of Mexico Studies.

To assist first responders with fire safety and prevention training, GCGV and our partners at the San Patricio County Economic Development Corporation **commissioned a fire safety trailer for the community.**

GCGV contributed \$180,000 to the United Way of the Coastal Bend through an annual workplace campaign, corporate contributions, and special events like the Annual Christmas Appeal, Supply our Students and golf tournament.

GCGV **contributed \$2 million to the City of Portland for the renovation of Indian Point Park** and construction of the new Indian Point Pavilion. The pavilion serves as a community gathering space and a celebration of the Texas coastal environment that residents enjoy.

GCGV **partnered with the Corpus Christi Symphony Orchestra** to bring concerts to special events in San Patricio County and provide school-based interaction between students and musicians to foster a love of music.
